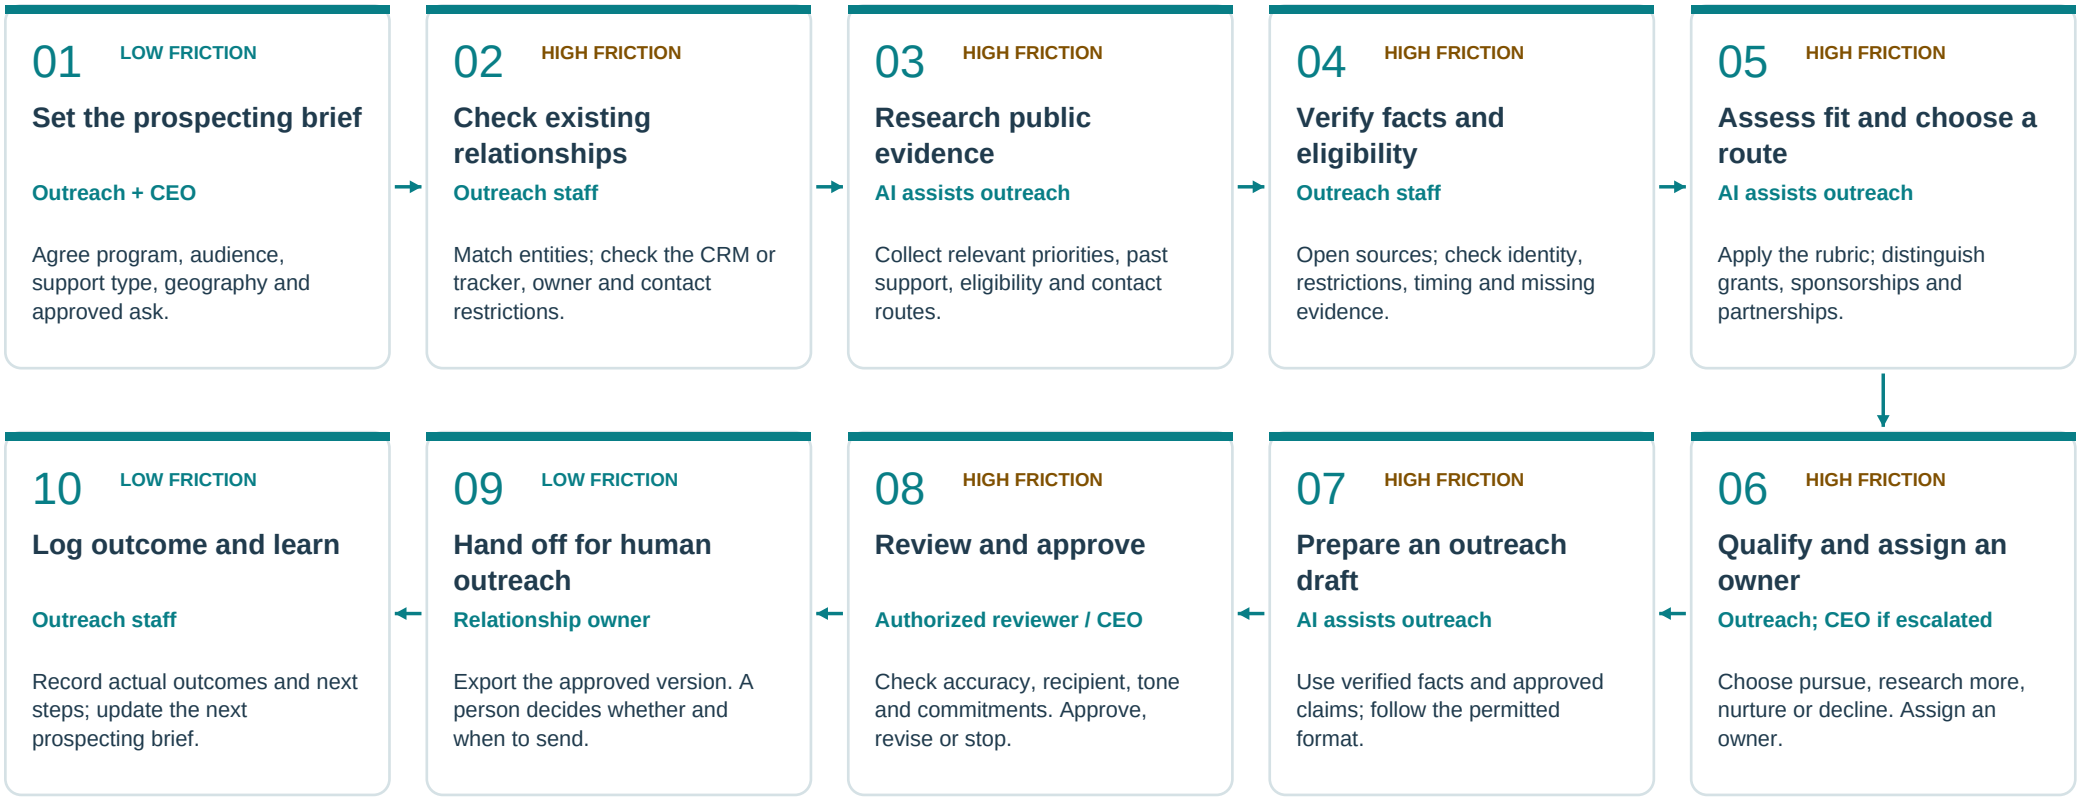
Partner & donor prospecting

Research prospects. Assess alignment. Prepare outreach for human review.

PROPOSED WORKFLOW - NOT AN OBSERVED CURRENT STATE

Owners, friction levels and approval rules are hypotheses. Outreach staff handle daily work; CEO involvement and delegated authority require confirmation.



Decision gates & return paths

02 Existing: coordinate with owner; suppressed: stop. | 04 Missing/conflicting evidence: return to 03; failed eligibility: stop this opportunity.

06 Research more: 03; nurture: 10; pursue: 07. | 08 Revise: 07; research issue: 03; approve: 09. | 10 Feedback informs the next brief in 01.

High friction = likely search, judgment or coordination burden; low = likely repeatable. AI assists 03, 05 and 07. Staff retain all decisions. No automatic sending.
